NIKKEN

Printing Supply U.S.A., Inc.

Extreme QSD-III

High-Performance, Alcohol-Replacement Fountain Solution Concentrate

Features & User's Benefits:

- One step process to run alcohol-free
- For all types of continuous dampening systems on Sheet-fed or Web presses
- Enhance Dampening Efficiency
- Wide press latitude
- Faster ink roll up on plate and reduce paper waste
- Excellent with UV inks
- Prevent excessive ink emulsification
- Best with chilled, soft to medium type water
- Multiple-use for CtP thermal, violet metal and silver-imaged polyester plates

"QUALITY-ASSURED" – Nikken's new **"EXTREME QSD-III"** Fountain Solution Concentrate has no compromise on quality. The **"EXTREME QSD-III"** answers many of today's print issues associated with changes and diversification in printing environment. "QSD" says it all, Quality – Simple – Dependable.

Quality - Simple - Dependable

For best results dilute 4 to 6 oz. of **Extreme QSD-III** fountain solution per gallon of water. Mix thoroughly. Set circulator temperature at 54°F. Set 3.0 - 5.0% if automatic doser is in use.
